EXCISE

SECRET

Attachment to 89-0111

On the 1 of March 1951, the newspaper "Albania Libre", organ of the "Independent Bloc" published the following articles:

KASAN DESTI IN CRISIS

Do you mind philo-communist Kasan Desti (forgive us Mr. Desti, aren't some members of your party playing the game of the communists with "tracts", "open letters" which contain the same vocabulary and the same slanders which were up to now used by the communists, and which are today used by your comrades; slanders, humiliations which are leveled against a great number of democratic Albanian patriots -- between them, till some months ago were members of the Organization in which you participated?)

Do you mind philo-communist Kasan bey offendi (sig) Desti, we want to give our attention today to the crisis which takes place among "The Albanian Democratic Agrarian Party," because in it we see an event which interests all the anti-communist refugees in general.

The crisis began since the day a great part -- the most important part and not vulgar traitors -- of the Balli Kombetar Organization, decided to keep during all the exile period, (with) "secret" and the name "Balli Kombetar Organization," without accepting the arbitrary modifications made by some former less qualified members of this organization, who created today the "Albanian Democratic Agrarian Party."

Thus were created two groups (or parties): "Balli Kombetar Organization", presided over by experienced, distinguished Albanian patriots as Hysni Vllasi, Ali Kelmendi, Kesho Naim, etc., and the "Albanian Democratic Agrarian Party" -- to all appearances presided over by Kasan Desti, but really managed by some elements who put themselves in evidence only when many others were killed by the communists or died in exile.

But the latter, discontent with the position reached from thousands of Albanians whose blood was spilled and with whom they never had blood relations, have begun, these last times, to slander, by the mouths of their stupid instruments, a person which was very heroic, and which humiliates unreasonably a great number of patriots. We don't belong to their ill-fated family.

Only a small thing can make these people lose their honor and fall in the most dirty vulgarity.

It is very difficult to find as no position with as those used by the silly instrument of the "Agrarian Responsible Party"...
In this newspaper we tentatively print "Front after Front," a article which was published in the "Bulletin" of the Albanian League of Australia, November 1938.

The Albanians in Australia, those who are over there since years, aiming to work and enrich themselves, have nothing to do with the "Bulletin" in general. "Bulletin" managed by the "Albanian Responsible Agrarian Party" in Rome and by those of their dupes which catered to Australia too at those years ago.

The Albanians in Australia have no interest in getting into politics with people they don't know and who are thousands of miles away. The Albanians in Australia wish only the liberation of Albania from the current communist domination. For the Albanians in Australia all the other countries are equal.

There is no doubt that the article "Front after Front" has been sent by "Bulletin", however, Albanians of the party apparently published near by Rome itself.

And does the article "Front after Front" really exist?

There is no doubt it exists, because the note accompanying the heavy article going on in this party, which was presented up to me as a whole strong help.

And as for such a article, the "Albanian Responsible Agrarian Party", full in justification which can never be held up just because now, they are strong, by suggesting that their propaganda, published will be and can be help. The help are people without feeling that their right to "help" or without any doubt (to prove of help) and "help" or "them" after those "fronts" of help.

But our task the committee have notified in the names of "help and others..." who were ready to get in the next extraordinary session. If their suggestion was accepted, they were a big success, naturally naturally without getting those right who helped, provided even the same members of the committee of Rome Party, who were named "Responsible Agrarian Party" (to prove of help) and "help" or "them" after those "fronts" of help. "help" those are help and "extraordinary session" to make "help" propaganda? and if it is not

attempting to understand from the Bulletin....of Australia, if some-
body named Smith and Robert Ferguson is still the strange to wit-
ness as Mr. Elsworth and his associates did from the same sort in which
they are now.

Further the "Wall Street" says that they were an anti-communist front to attract war investments after the liberation of Alaska, looking to build up the Alaskan economy, the money being for the government to spend. But that money leads to spend that is to say, it was no more than a front for the money for the military, industrial, and other war investments. That the war is longer than the war was called. That the money was used for the benefit of Wall Street, not for the benefit of the people. etc.

to make good our position after the liberation of Albania; under the condition. If this were the truth, both nations in fact, the "collaborators" would suffer punishment of death, the communists would be executed as human beasts. We do not see in human nature any of the "divine spark" thought to place his son as secretary in that country. It is done, Mr. Justice.

(This conversation will continue in our following number.)

It is our most fervent hope we will see it so
in time that the National Independence
Party has said Mr. Roosevelt is not
to come from Spain to Spain. It will
show who are the real supporters
of the existing government, the latter have
before continued democracy, etc.
